The temporary fuel surcharge is intended to compensate for the current cost of highway fuel incurred during refuse collection operations. This surcharge applies to all customer invoices with the exception of direct landfill fees.

The fuel surcharge is based upon the National average price per gallon of diesel fuel as published by the Energy Information Administration of the U.S. Department of Energy using the U.S. average column.

<http://www.eia.gov/petroleum/gasdiesel/>

The fuel surcharge fluctuates on a .25% scale. The scale begins at \$1.30 per gallon with a fuel surcharge of .25%. The fuel surcharge percentage will increase or decrease with each price per gallon fluctuation of \$.10 (Example: when the national average price of diesel fuel is between \$1.30 and \$1.40, the fuel surcharge percentage remains at .25%. If the price per gallon goes to \$1.41 the fuel surcharge will increase to .50%.

If the national average price per gallon of diesel fuel drops below \$1.30, the surcharge dissipates to 0\$

At the time of this filing, the average national cost of diesel fuel is \$5.12, therefore the fuel surcharge is
